

# RESUME ID #114

---

## Objective

Highly motivated, dedicated, and results-driven professional to secure a position with your company in *Production, Assembly, as a Machine Operator, as a Quality Assurance Inspector, or as applicable* utilizing my skills, training, and experience

## Summary of Qualifications

- 10 years' experience in various production settings including assembling products and equipment, manufacturing furniture, testing finished industrial generators and heaters for integrity/functionality, automotive parts, and operating a variety of machines
- Operates forklifts (stand-up and reach, formerly certified), overhead cranes, and pallet jacks to reposition raw materials and finished products
- Experienced training new personnel per supervisor request, delegating work orders, monitoring all work activities for quality, expediency, and safety, conducting performance evaluations, and consulting with upper management for employee status/progress reports
- Experienced using various hand/power tools including air drills, air hammers, cutters, de-burring tools, staplers, measuring devices including calipers and micrometers
- Prepares finished products for shipping including packaging/banding, loading and unloading trucks
- Performs inventory control including using electronic hand-scanners/barcode readers and updating a computer database
- Well-experienced testing and inspecting finished products as a Quality Assurance Inspector for proper craftsmanship and that units operate as per specifications
- Experienced in various vocational trades, building maintenance, flooring installations, custodial maintenance (including operating floor auto-scrubbers, waxers, and buffers)
- Multi-tasks effectively, consistently meeting or exceeding daily quotas ahead of critical deadlines
- Dependable, hardworking, honest, and efficient with no health or lifting restrictions
- Works well independently or collaboratively in a team environment

## Professional Experience

10/17 – 01/18

### ***Braiding Machine Operator (Temporary)***

Delfingen, Inc., Niagara Falls, NY

- Procured the proper amount of stock from the warehouse and removed the amount of material from the company's raw material stock in the database, the initial phase of producing latex tubing for the insulation of a wide range of electrical wires, customized for and shipped to clients worldwide
- Prepared material for each production run and operated a machine to process braided fiberglass insulation into tubing, and set the tubing in rolls into a baking oven for up to 9 hours
- Entered the spool order number into the production computer database to communicate to other personnel that the spool was ready for the next phase of production
- Initiated, processed, and produced up to 24 spools fiberglass insulated tubing per shift, keeping detailed records of spools completed, with individual spool weights up to 25 pounds
- Consistently met and/or surpassed all daily production quotas and objectives

09/15 – 05/17

### ***Production Inspector / Tester / Forklift Operator***

04/10 – 04/13

Costanzo's Welding, Niagara Falls, NY

- Inspected and tested industrial generators and heaters for integrity/functionality
- Operated production machines manufacturing heat exchange fins for assembly
- Operated socket guns and other hand tools to secure components into tanks also working with copper, copper/steel alloy, and stainless steel
- Operated forklifts to unload and load tractor trailers and flatbeds, repositioning raw materials throughout the warehouse or in proximity to production stations, and taking finished products to staging areas in preparation for shipping
- Kept all work areas clean and organized

04/14 – 03/15

***Production / Quality Assurance***

Tulip Corp., Niagara Falls, NY

- Operated injection mold machines to produce battery casings for the automotive industry
- Operated hard-rubber press to form the battery casings
- Trimmed/ground down flashing using abrasives as necessary and stacks finished products on a pallet for placement in the warehouse
- Operated recycling equipment to take scrap plastic and prepare it for making finished products
- Tested all products to ensure batteries were produced properly prior to shipping
- Operated forklifts and pallet jacks to reposition raw materials and finished products throughout the warehouse
