

# RESUME #141

---

## OBJECTIVE

Highly motivated and results-driven professional to secure a position with your company utilizing my extensive skills, training, and experience in *Chemical Operations, Production, Warehouse, or as applicable*

## SUMMARY OF QUALIFICATIONS

- Over 20 years' experience working for a world renowned company, in support of creating structural repositories for chemical baths operating through the DCS system, building cells for reactive metals to produce sodium and lithium, consistently meeting and/or exceeding all daily production goals and quotas, facilitating personnel to manufacture the highest quality product results while maintaining safe operations at all times
- Experienced monitoring/operating gauges and other instrumentation in the production of reactive metals
- Trained for Hazmat, HAZWOPER, OSHA, and possesses forklift certification, trained and experienced with MSDS, performing duties handling HazMat materials, and wearing PPE
- Trained for full compliance to machine lock-out / tag-out protocols and procedures
- Operates forklifts, skidsteer, pallet jacks, hydraulic press jacks, overhead cranes, Caterpillars, track mobiles, and more
- Experienced training new personnel upon supervisor request including delegating work orders, monitoring all work activities for quality, expediency, and safety, conducting performance evaluations, and consulting with upper management for employee status/progress reports
- Experienced performing detailed inventory control reporting surpluses or deficiencies to upper management
- Strong communications, interpersonal, organizational, analytical, mechanically-minded, and problem-solving skills
- Multi-tasks effectively, learns new systems quickly, and completes all projects on-time or ahead of critical deadlines
- Familiar with using computers, Windows, Internet research, and email
- Works well independently or collaboratively in a team environment

## PROFESSIONAL EXPERIENCE

---

07/88 – 03/17 *Sodium – Lithium Cell Builder / Sodium Operator*

DuPont Chemours Plant, Niagara Falls, NY

- As a Cell Builder, responsible for the construction of cells, as part of a total plant count of 120 cells, made of bricks and mortar for the express purpose of mixing chemical baths for the production of sodium and lithium with a life-cycle of approximately 3 years
- Responded to work orders, responsible for demolition and removal of malfunctioning cells within a 2-day project timeline, rebuilding new cells over a 5-day process before new cells could go online
- Maintained full compliance to all OSHA safety regulations including the wearing of authorized PPE at all times
- Trained new personnel for company SOP, following strict guidelines for production and safety, and consulted with upper management for employee training status/progress reports
- Operated forklifts to remove demolition materials and to reposition furnace bricks to building sites
- Responsible for maintaining proper and proportionate mixtures for chemical baths in the production of sodium and lithium cells and monitoring all processes for safe production
- Changed cell mechanisms as needed and shut down production runs due to cell inefficiencies related to the limitations of unit life cycles
- Trained and fully compliant to all OSHA and HazMat rules and regulations
- Utilized raw materials as a Sodium Cell Operator and produced molten reactive metals
- Responsible as a Sodium Handler operating mill trucks and forklifts to reposition 2000-pound drums of liquid sodium to staging areas near distribution networks and, subsequently, filled railcar tankers
- Kept detailed logs of all production runs and consistently met or exceeded all daily quotas to client specifications

## Military Experience

---

*Tank Mechanic, PFC, E5, Honorable Discharge*

US Army, Fort Dix, NJ

## Education

---

*Diploma*

Trott Vocational High School, Niagara Falls, NY
